March 29, 2022

Dear Colleagues,

I am pleased to announce a call for participants in two projects funded by the [Innovative Instruction and Technology Grant \(IITG\)](#) program. IITG seeks to promote research and innovation to foster understanding of how new technologies support academic excellence and student success. The attached projects will focus investigation on software tools that enable flexible instruction at scale and help inform the new [SUNY Digital Learning Environment](#). True to the spirit of the IITG program, the 2021-2022 projects will be faculty-guided efforts.

1. [Tools for HyFlex Course Delivery](#)

This project will examine the efficacy of online tools that support HyFlex learning models valued by non-traditional and adult students with multiple demands on their time. SUNY defines [HyFlex](#) as instruction that simultaneously combines online and face-to-face instruction into a single course section, with the mode of direct instruction determined by each individual student (e.g., choice of seated-in-class, connected remotely, or attended at a later time via recording).

2. [Tools to Teach Large Courses](#)

Faculty will explore instructional technology tools that help facilitate feedback, assessment, and interaction in large enrollment (≥ 50 students) courses. The goal of this project is to guide professional development and investment in the tools that prove suitable for teaching larger courses.

The deadline to apply to be a participant in either project is **Monday, April 25**. For the HyFlex project, go to <https://bit.ly/HyFlexIITG>. For the Large Courses project, go to <https://bit.ly/LargeCoursesIITG>. Both calls are also attached here as PDFs. There are links to short application forms at the end of each document. Those who apply will be informed no later than May 6th if they will be invited to participate.

Please do not hesitate to contact Chris Price, Academic Programs Manager, SUNY CPD, at chris.price@suny.edu with questions.
